EXPERIENCE

Fast Supplements LLC – Full-Stack Web Developer

Mar 2025 to Present

- **Developed and maintained two complete websites from concept to launch:** a Shopify e-commerce platform and a NextJS application with Strapi headless CMS, managing full customization, version control, environment handling, and third-party integrations.
- **Adapted broken third-party Shopify code into custom solutions** that met specific business requirements and improved functionality.
- **Implemented comprehensive SEO optimization** resulting in improved search engine visibility, organic traffic growth, and tracked conversions.
- **Collaborated with team members to implement website blueprints from Figma and manage digital marketing initiatives** (Google Ads, TikTok advertising & affiliates, etc.) while providing technical support and IT assistance for business operations.
- **Saved hundreds of dollars in subscription fees** by devising various custom alternatives to replace paid third-party services.

Silicon Avatar Software LLC – Freelance Web Developer

Jan 2023 to Feb 2025

- **Optimized website performance by up to 50%**, reducing load times and improving user experience through efficient coding practices.
- **Developed and maintained responsive websites** using React and NextJS, ensuring cross-browser compatibility and dynamic user interfaces.
- **Implemented SEO best practices**, significantly improving website visibility and search engine rankings up to first result positions.
- **Collaborated with clients** to deliver customized web solutions, providing technical guidance and gathering requirements effectively.

Ocular Instruments – Production Staff

Aug 2018 to Jan 2025

- **Led department**, coordinating with peers to meet company production goals and ship out thousands of products on time.
- **Streamlined the casing process** by devising several efficient and time-saving methods of packaging, organization and material preparation.

Disney Parks Technology Services – SDET Intern

Jun 2023 to Sep 2023

- **Restored functionality to 12 broken test-case audit features**, unblocking the GQE Team's workflow and improving testing efficiency.
- **Updated and maintained mobile test automation framework** using JavaScript, TypeScript, and Cucumber BDD framework.
- **Refactored Chrome extension** to transition from Hewlett Packard's ALM tool to QTest management tool, updating all functions to comply with QTest's REST API.

C2S Technologies – Console/PC Tester

Jan 2017 to May 2018

- **Collaborated with team members** to complete a series of test cases and verify full project functionality ahead of schedule.
- **Discovered and documented** dozens of bugs across a variety of different projects, working alongside the development teams through various detailed reports and imagery.
